NET WT 25 LB (11.33 kg)

MIXING DIRECTIONS

ALWAYS WEIGH LAND O LAKES® ULTRA FRESH® LAMB MILK REPLACER POWDER FOR ACCURACY. Use ONLY LOW SODIUM (<50 PPM) water for mixing and feeding.

Mix the milk replacer powder according to the schedule listed below by adding powder to water as indicated. Mix well.

	MILK REPLACER POWDER	WATER (110-120°F)	FINAL VOLUME
SMALL BATCH	0.30 POUNDS*	+1.5 PINTS	1.75 PINTS
LARGE BATCH	1.6 POUNDS	+1 GALLON	1.15 GALLONS

*Enclosed measure holds approximately 0.30 pounds of dry powder.

FEEDING DIRECTIONS

HAND FEEDING:

When hand feeding by bottle, LAND O LAKES® Ultra Fresh® Lamb Milk Replacer should be fed at 100-105°F. Always offer fresh, clean, low sodium (<50 PPM) water and high-quality dry feed. The following feeding schedule is recommended:

After Colostrum Feeding to 3 Days: Feed 1/2 cup (4 fl oz) of reconstituted LAND O LAKES® Ultra Fresh® Lamb Milk Replacer 4 to 6 times a day at 4 hour intervals.

4 Days to 2 Weeks: Gradually decrease the number of feedings and increase amount of LAND O LAKES® Ultra Fresh® Lamb Milk Replacer per feeding. At two weeks of age, 1-1.5 cups (8-12 fl oz) of reconstituted LAND O LAKES® Ultra Fresh® Lamb Milk Replacer 3 times per day is sufficient.

2 Weeks to Weaning: Feed reconstituted LAND O LAKES® Ultra Fresh® Lamb Milk Replacer twice daily and in gradually increased quantities.

Weaning: Feed once daily until consuming at least 1 lb of creep feed daily for 3 consecutive days, then wean.

FREE-CHOICE FEEDING:

Mix fresh solution daily and provide ready access to a clean nipple feeder. When starting lambs on nipples, they will require assistance but will adapt readily and nurse independently within 1 or 2 days. LAND O LAKES® Ultra Fresh® Lamb Milk Replacer solution should be kept cool (<60°F) to help keep it fresh and prevent overeating.

GENERAL RECOMMENDATIONS

1. Keep all equipment used for mixing and feeding thoroughly cleaned.
2. Newborn lambs should receive colostrum as soon after birth as possible (within 3-4 hours).
3. Consult with your veterinarian on a dry ewe and lamb vaccination program, including, but not limited to *E. coli*, *Clostridium* and *Salmonella*.
4. If scouring occurs, continue to feed milk replacer but also feed electrolytes and water, separately. If scours persist, contact your veterinarian for proper treatments.
