Supplement

For Beef Cattle on Pasture

Guaranteed Analysis:

Crude Protein (Min)	20.00%
Crude Fat (Min)	5.00%
Crude Fiber (Max)	2.00%
Calcium (Min)	0.75%
Calcium (Max)	1.25%
Phosphorus (Min)	1.00%
Salt (Min)	2.25%
Salt (Max)	2.75%
Magnesium (Min)	3.00%
Copper (Min)	45 ppm
Manganese (Min)	170 ppm
Selenium (Min)	3.3 ppm
Zinc (Min)	130 ppm
Vitamin A (Min)	50,000 IU/lb
Vitamin D-3 (Min)	5,000 IU/lb
Vitamin E (Min)	5 IU/lb

Ingredients:

Processed Grain By-Products, Molasses Products, Hydrolyzed Feather Meal, Magnesium Oxide, Vegetable Oil, Monocalcium Phosphate, Dicalcium Phosphate, Salt, Calcium Propionate (a preservative), Roughage Products, Calcium Carbonate, Selenium Yeast, Brewer's Dried Yeast, Manganese Sulfate, Zinc Sulfate, Copper Sulfate, Vitamin A Supplement, Manganous Oxide, Zinc Oxide, Vitamin D-3 Supplement, Mineral Oil, Vitamin E Supplement, Ethylenediamine Dihydroiodide, Cobalt Carbonate and Calcium Iodate.

Introductory Period: Following a 7 to 10 day acclimation period, average consumption should be 1 to 2 pounds for mature cattle with unrestricted forage supplies. Position the blocks 50 to 75 feet from loafing, feeding and watering areas. Some repositioning of blocks may be necessary as animals become acclimated to the presence of the blocks. Move blocks closer to increase consumption; further away to decrease consumption. If overconsumption occurs for more than two weeks and repositioning of blocks does not correct the situation, remove blocks and evaluate the overall feeding program. **DO NOT ALLOW STARVED ANIMALS FREE ACCESS TO THIS BLOCK.**

CAUTION: Use as directed. Consumption of selenium should not exceed 3 mg per head daily.

WARNING: This product, which contains added copper, should not be fed to sheep or any species with a low tolerance to supplemental copper.

Feeding Recommendations:

1. Feed 1 block per 15 to 30 head. All animals should have equal access to blocks. Timid and smaller animals need their share.
2. Place blocks where animals congregate. Locate blocks throughout the pasture at loafing, grazing, feeding and watering areas. Adequate distance must be maintained between blocks to minimize crowding - 10 feet minimum.
3. Feed blocks continuously along with a plentiful source of forage and clean, fresh water. Cattle should not run out of blocks. When a block is two-thirds consumed, provide a new block near it.
4. Cattle should consume 1 to 2 pounds per head daily based on a 1,000-pound animal.
5. Consumption of this block may vary depending upon animal body condition, quality and quantity of forages, seasonal weather conditions, and most importantly, feeding locations of blocks with respect to loafing, grazing, feeding and watering areas.
6. If additional mineral and vitamin fortification is desired, provide an appropriate SWEETLIX[®] self-fed mineral supplement in addition to this supplement.

For additional information, please contact your SWEETLIX[®] representative.

Net Weight: 200 LBS. (90.7 KG)

Batch # / MFG
