Feeding Directions

Feed as a mineral to goats on native or improved pastures when mineral nutrient levels in the forages are very low. Consumption should be from 1 to 1.5 ounces (0.06 to 0.09 lb.) per head per day. For best results, keep in a covered trough that protects it from the environment. Always provide plenty of clean fresh water for drinking.

CAUTION: THIS FEED CONTAINS ADDED COPPER. DO NOT FEED TO SHEEP OR OTHER RELATED SPECIES.
