FEEDING DIRECTIONS

Feed as the sole grain ration at the rate of 0.5 to 1.5% of body weight depending on condition, physical activity and/or production stage of the horse. For horses consuming more than 0.5% body weight per day, provide feed at a minimum of twice-a-day in equal portion. This is not a complete feed. Provide a source of good quality forage in the form of hay or pasture. Always provide plenty of clean, fresh water for drinking. Keep feed fresh in cool, dry storage. DO NOT use feed that is old, molded or insect contaminated.

CAUTION: This feed contains added copper. Do not feed to sheep or other related species.
