FEEDING DIRECTIONS

This feed should be used as a supplement to pasture forage for deer and can be fed free choice or in measured amounts to provide protein, energy, minerals and vitamins necessary for growth and development, pregnancy, lactation and antler growth. Feeding amounts will depend on where the deer are in their production cycle, during late pregnancy, lactation and antler growth. Deer may eat 0.75 lbs. to 2.00 lbs. per head per day depending on forage availability and quality.

CAUTION: This feed contains added copper. Do not feed to sheep or other related species.
